DETAILED ACTION

Election/Restrictions

This application contains claims 10, 11 and 13 drawn to an invention nonelected with traverse in a communication filed 2/23/2006. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, 6, 7, 9 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO 0638486 in view of Fond '702.

There is disclosed in the European reference a cartridge containing one or more beverage ingredients and being formed from substantially air and water-impermeable materials, the cartridge comprising a storage chamber containing the ingredients, the cartridge further comprising a filter 10 disposed between the storage chamber and at least a part of an undersurface of a top 2 of the cartridge, one or more passages 11 being formed between the filter and top of the cartridge, which one or more passages communicate with an outlet of the cartridge whereby a beverage flow path linking one or more inlets 7 to the outlet passes upwardly through the filter into the one or more passages.

Art Unit: 1761

There is disclosed in Fond a disc-shaped cartridge 1 containing one or more beverage ingredients 5 and being formed from air and water impermeable materials, the cartridge comprising a storage chamber, wherein the aspect ratio of the vertical height of the storage chamber to the breadth of the chamber is between 0.10 and 0.43 (see col. 2, lines 45-50).

It would have been obvious to one skilled in the art to modify the cartridge of EPO 0638486 with that taught in Fond, for the purpose of constructing a beverage cartridge of such size and shape so as to be compatible to different size coffee machines.

Claims 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO 0057671 in view of Fond '702.

There is disclosed in the European reference a cartridge containing one or more beverage ingredients and being formed from substantially air and water-impermeable materials, the cartridge comprising a disc-shaped outer member 12 having a central axis, an interior storage chamber containing the ingredients, a hollow inwardly directed cylindrical extension 22 centered on the central axis, an upper face 30 positioned radially outward from the central axis, an outlet 28 axially aligned with the extension, and an inlet 42 aligned with the upper face on an opposite side of the cartridge.

There is disclosed in Fond a disc-shaped cartridge 1 containing one or more beverage ingredients 5 and being formed from air and water impermeable materials, the cartridge comprising a storage chamber, wherein the aspect ratio of the vertical height

of the storage chamber to the breadth of the chamber is between 0.10 and 0.43 (see col. 2, lines 45-50).

It would have been obvious to one skilled in the art to modify the cartridge of EPO 0057671 with that taught in Fond, for the purpose of constructing a beverage cartridge of such size and shape so as to be compatible to different size coffee machines.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
